

MC3-RR

Mobile Transportable **CLEAN CUBE**
for Rapid Response Applications

Synergy Med Global Solutions Specializes In Streamlined Development, Delivery & Construction of Complex, Clean Clinical Environments. Delivering a Safer, Smarter Space to Patients and Staff.

CLEAN CUBE
US Patent No.: US10,071,177 B1
US10,369,242 B1

MC3-RR

Video Overview Available at:
Synergy-MedSolutions.com/MC3-RR

The MC3-RR (Rapid Response) units contain many technological innovations aimed at improving care and safety for caregiver, patient and others. It is an extremely durable, modular, expandable, upgradeable, and fully transportable multi-use environment.

CLEARANCE & SCREENING KIOSK **SYNERGY CLEAR**

Each MC3 unit is fully integrated with multiple SYNERGY CLEAR stand-alone kiosks, the MC3 provides unprecedented access-point control opportunities.

Every Kiosk Includes:

- No-touch Temperature Diagnostics
- Card Reader Access
- Hand Sanitation Dispenser
- Recorded Access Control
- Interactive Video
- Online Messaging
- Advanced Facial-recognition
- Stand-alone or Integrated with HR and Access Control Systems.

Network Multiple Kiosks Together at Corporate Plant or Division Sites.

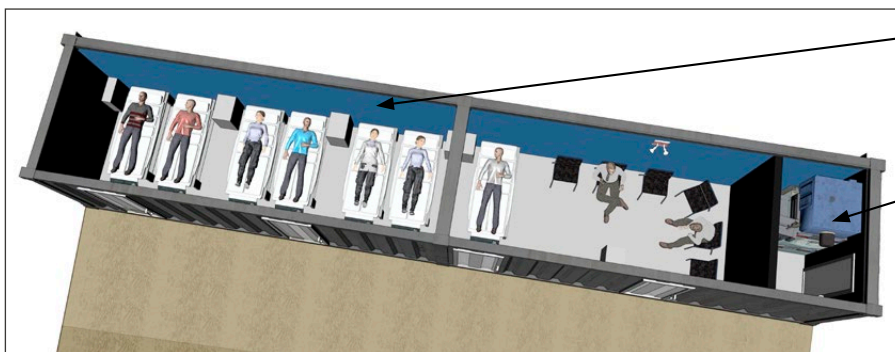

Each MC3-RR Cube includes/provides:

- Modular Clinical Environments with a universal infrastructure that allows for quick and easy on-site modification into different care, testing, triaging and housing modalities.
- Technology which allows for automated leveling and connecting in the field for more efficient assembly.
- Automated or manual cleaning cycle with HP Vapor (vaporized hydrogen peroxide) for greater than 6-log decontamination delivering greater than 99.9999% reduction in pathogens in select care setting chambers, the entire MC3-RR unit, equipment and PPE such as face masks and other items allowing for reuse.
- Hermetically sealing care modules to support disinfection cycle, patient isolation, or to protect personnel from outside chemical or environmental hazards. Each unit has dedicated air handling units with pharmaceutical grade HEPA filtration.
 - Hooks in to grid for power and data with optional off-grid power options.
 - Integrated potable water and waste system as well as ability to tap into community water and waste.

Multipurpose Configuration Accommodates Test/Triage or Office/Lab Space

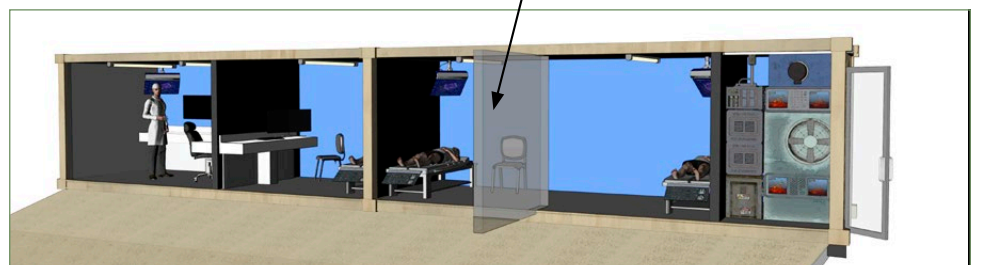

- Potential H2O and Waste Storage Underneath or Behind

- Sterile Mobile Sleeping Quarters for First Responders

- Mechanical Room

- Removable Walls Facilitate Multiple Configurations

MC3-R1, R2, R3 SPECIFICATION SHEET COMPARISON

	R1	R2	R3
HVAC			
Supply Air Filtration Level	1,200 CFM HEPA	480 CFM MERV-8A	480 CFM MERV-8A

Interior Walls

- Insulated Vapor Barrier
- Solid Surface PVC with Heat Welded Seam
- Rail Mounted Accessory/Equipment
- Reconfigurable, Hermetically Sealing Wall Partitions with Optional Interior Door
- Integrated HP Vapor Generator with 4 Compartment Separation & Dampening

Flooring

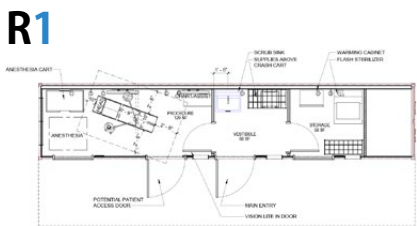

- Medical Grade Sheet Vinyl with Architectural Accent
- Intergral Cove Base/All Heat Welded Seams
- Continuous Through 35' Care Space

Ceiling

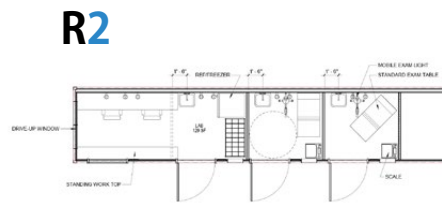

- Two Sealed Medical Grade Luminaries Per 4 Per Container Care Space
- Medical Grade Laminar Air Diffuser
- Future-proofed Equipment/Accessory Mounting Structure

Non-fixed Equipment

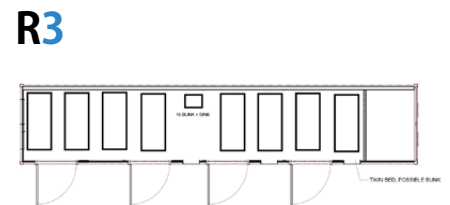

- See Detailed Equipment List Per Specialty Care Zone

PROCEDURE, HIGH RISK, CRITICAL, ICU STEPDOWN, PPE & EQUIPMENT DECONTAMINATION

MINOR PROCEDURE, QUARANTINE/ TEMP BEDS, TEST/TRIAGE, LAB/ CLINICAL TRIAGE, TEAM CARE/ PATIENT SUPPORT, PPE & EQUIPMENT DECONTAMINATION
